What do we do?

Software as a Service

Market-ready business applications in the cloud to improve consumption, logistics, and maintenance processes based on real-time communication with dispensing machines.

Hardware Products

Proven quality IoT hardware that connects different dispensing machines to Internet using GSM connectivity.

Payment accessories that enable close and open loop payment on these machines.

Custom Solutions

Fast development of custom cloud-based business applications built on top of robust connected machines platform.

Quality cost-effective hardware development.

Solution: Televend Smart Vending

Smart Vending - remote monitoring and operations management based on real-time data.

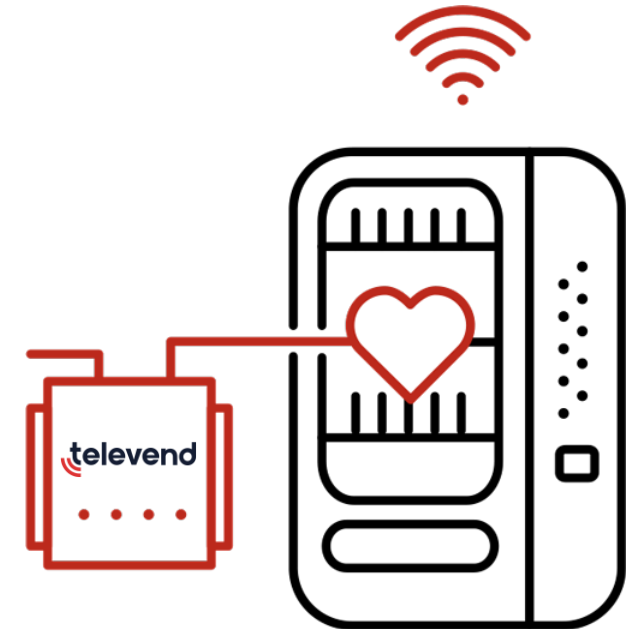

Televend is IoT solution that transforms vending machine into the point on Internet. Machine learning and Artificial Intelligence are used to maximize profit.

Televend Cloud is a dedicated vending cloud platform that improves business operations based on real-time information and provides different payment options for private and public vending.

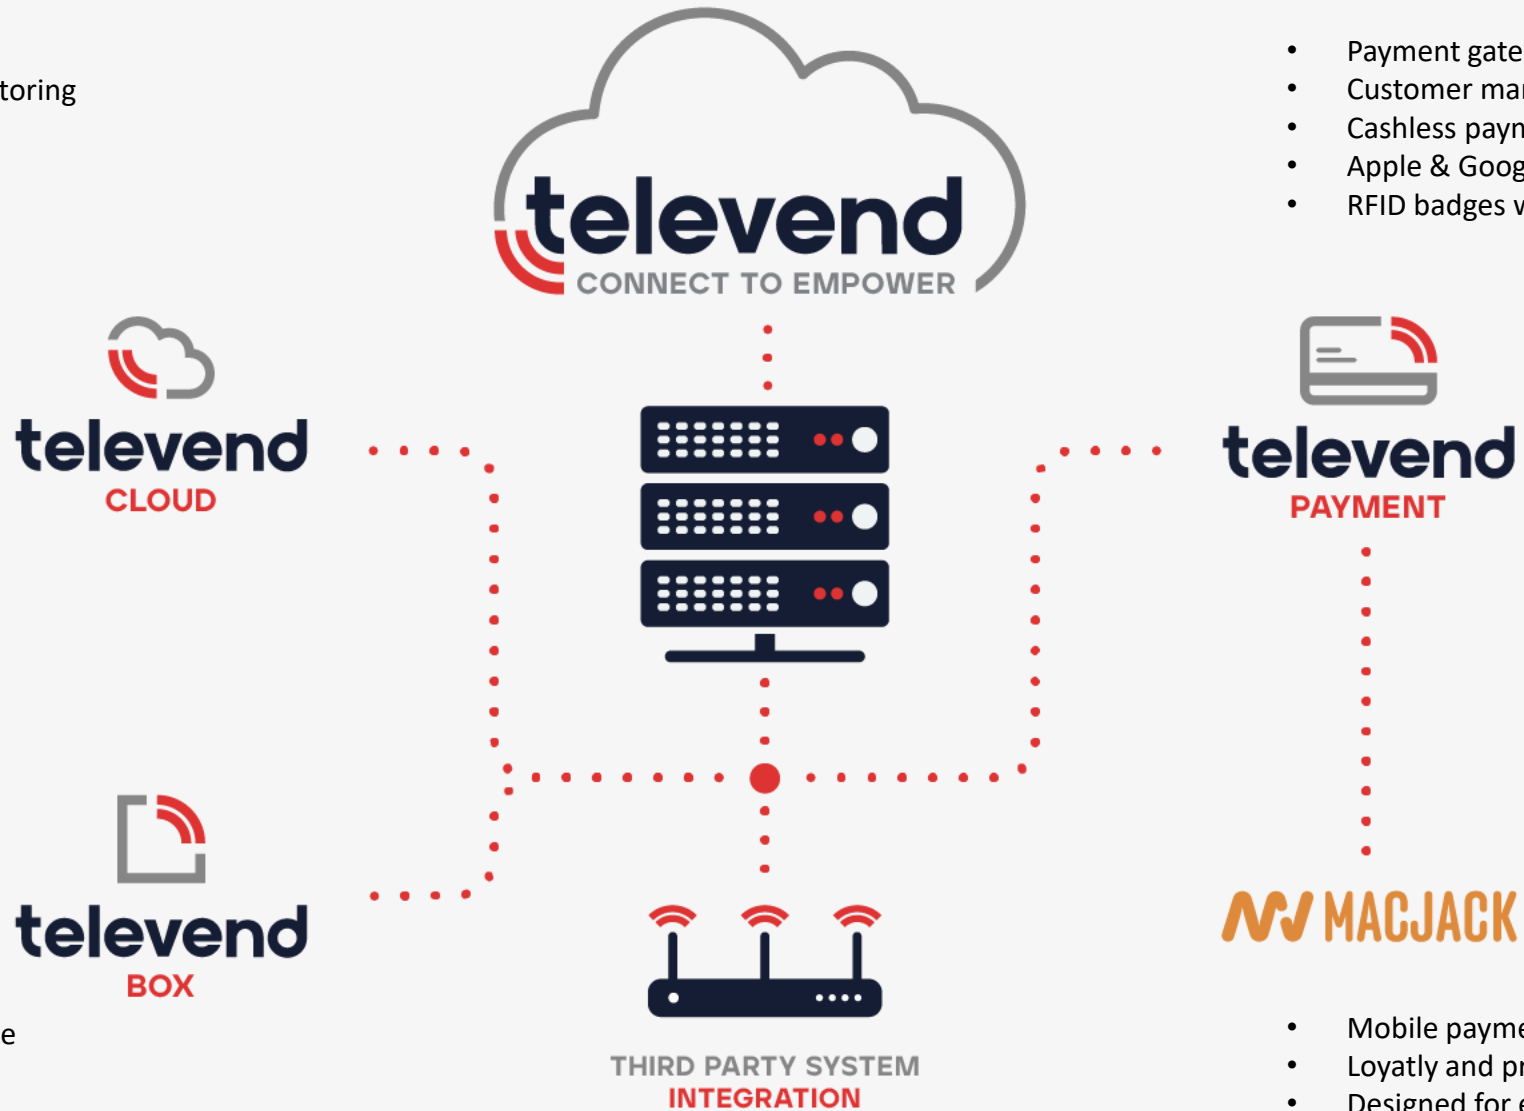

Televend is a solution for all automated retail verticals: commercial vending, industrial vending, HoReCa, Professional coffee service etc.

Projekt Integrator tvrtke INTIS

07.12.2020 – 01.01.2023

32.803.179,69kn Vrijednost projekta

16.656.839,84 BESPovratna sredstva

Predmet projekta je ulaganje u inovaciju poslovnih procesa i organizacije poslovanja konzorcija s ciljem komercijalizacije proizvoda NUTRICO.

Proizvod rješava problem neadekvatnog hladnog lanca koristeći najmodernije inovativne tehnologije. NUTRICO omogućava uspostavljanje dobavljačkih odnosa/lanca vrijednosti s drugim poduzećima tzv. Integratorima.

Partneri na projektu i su: HMS informatika, Xylon d.o.o. te tvrtka Atmosfera d.o.o.

Predviđeno trajanje projekta je 24 mjeseca.

Ukupna vrijednost projekta je 35.715.730,55HRK, iznos prihvatljivih troškova je 34.715.730,55 HRK, iznos neprihvatljivih troškova 1.000.000,00 HRK.

Očekivana bespovratna sredstva iznose 17.613.115,27 HRK

KK.01.2.1.02.0158
29.04.2021 – 01.07.2023
T-LOGIC

Predmet projekta je razvoj T-LOGIC sustava za automatizaciju rada i potpuno autonomno odlučivanje (Virtual Manager) u logističkim tvrtkama koje opslužuju samoposlužne automate.

T-LOGIC je autonoman sustav koji se temeljem umjetne inteligencije i strojnog učenja adaptivno prilagođava promjenama koje se dešavaju tijekom radnog dana i tjedna.

Partner na projektu je Fakultet elektrotehnike i računarstva (FER), Sveučilište Zagreb.

Predviđeno trajanje projekta je 36 mjeseci.

Ukupna vrijednost projekta je 42.271.201,92 HRK, a iznos ukupno prihvatljivih troškova projekta je 42.271.201,92 HRK. Očekivana bespovratna sredstva iznose 29.745.963,94HRK.

Testimonials

„Fantastic!”

Televend gave us a unique opportunity to interact with consumers on a daily basis and enabled us to increase sales immediately.

„Experts!”

Televend was our best partner for the present and the future. With Televend, we have revolutionized the management of our company.

„A true partner!”

Televend has been a very collaborative partner in the past years, helping to rethink our operating procedures fundamentally.
